## 4. Review of Operations

During the term under review (April 1, 2008 to June 30, 2008), as part of the National Health Insurance reform, the Japanese government set the reduction in medical service fee and introduced two new programs in April - one is the special helthcare check program for metabolic syndrome and the other is the medical insurance program for over age 75 . Medical equipment suppliers continued to face a severe business environment.

Japan: Domestic sales showed strong growth as the Company continued to focus on promoting IT system solution for hospitals and launched new initiatives for changing eivironments such as spread of AEDs and the growing point-of-care testing market. In the university market and public hospital market, sales of Patient Monitors increased, primarily supported by sales growth of bedside monitors and new central monitors. Sales of Medical Supplies also increased steadily. In the PAD (public access defibrillation) market, sales of AEDs increased significantly as the Company enhanced its indirect sales channels, in addition to its direct sales force. As a result, domestic sales increased $22.6 \%$ over the first quarter of FY2007, to $¥ 21,252$ million.
International: While sales of Physiological Measuring Equipment and Patient Monitors increased, sales of Medical Supplies, Treatment Equipment, and hematology analyzers decreased from the prior year quarter when we had large-scale orders. As a result, international sales decreased $7.8 \%$ over the prior year quarter, to $¥ 5,479$ million.

Overall sales during the term under review increased $14.9 \%$ over the prior year quarter to $¥ 26,732$ million and operating income rose $48.0 \%$ to $¥ 1,938$ million. Ordinary income increased $37.5 \%$ to $¥ 2,276$ million and net income increased $59.7 \%$ to $¥ 1,202$ million over the prior year quarter.
